

# Teldor

## Cable Solutions

# Teldor Product Range

TELDOR manufactures thousands of wire and cable types in unparalleled speed.

## /// Data Cables

High performance, Computer and LAN, Cat. 5e to Cat 8.2, Solutions for data centres, Work Area, Patch Cords, Multicable Composite and hybrid.

Fire resistant, Harsh environments and multiple deployment options are available.

## /// Fiber Optic Cables

Optical fibers for systems requiring high data transfer rate. Indoor/outdoor, distribution, Breakout and tactical for multiple deployments. Fire resistant, harsh environments, resistance to both environmental and hazardous fluids and compounds as well as flexible and rigid designs options are available.

## /// Bus and industrial Ethernet Cables

CanBus, ProfiBus, Device Net, FieldBus, RS485/422/232 High-speed digital communication enabling reliable industrial networks for effective automation, control system and flawless operations. Fire resistant, harsh environment and chemical resistance options are available.

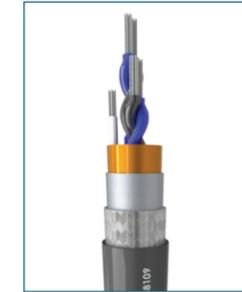

## /// Hybrids, Customized and Defense Cables

Thousands of products featuring a wide variety of conductors, fiber optics, special sheathing and armoring, as well as hybrid composite designs, suitable for diverse applications and customizable to your requirements. Additionally, suitable for naval and aviation applications, with custom-made options like smart tow arrays, tethering, multiple deployment, repeated bending, drag chains, and more. Fire resistant, harsh environment, and hazardous location options are available.

# Teldor Product Range

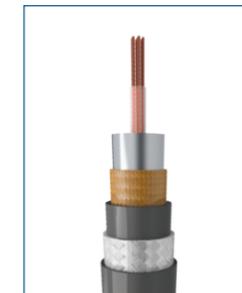

## /// Low Voltage Cables

Wide selection of layouts, jacketing and insulations materials. 250-300 KV, 600-1KV layout; Singles, Pairs and Triads suitable for ambient as well as harsh/hazardous environments and Intrinsically Safe. Fire resistant, Harsh environments and multiple deployment options are available.

## /// Control and Alarm Cables

Reliable, Securing industrial processes for automation and control with a wide selection of layouts. Thermocouple, for automation, control, hazardous locations and intrinsically safe requirements. Fire resistant, Harsh environments, hazardous locations and multiple deployment options are available.

## /// Marine, Oil and Gas Cables

An extensive and comprehensive portfolio of communication cables and solutions for the Marine, Oil and Gas industries. Jacketing materials include SHF1, SHF2, MUD, and NEK 606. All products are Type-approved by ABS, DNV, LR and RMRS, and are fully compliant with applicable marine standards. Fire resistant, harsh environment, and hazardous location options are available.

## /// Instrumentation Cables

Robust, safe and suitable for ambient as well as harsh/hazardous environments. Intrinsically Safe, Designed for a wide variety of applications. Fire resistant options are available, including a wide variety of construction materials, armoring and shielding materials.

# Teldor

## Cable Solutions

Teldor Cables and Systems offer worldwide customers a comprehensive portfolio of communication cables and solution for the Industrial, Marine, Oil and Gas, Telecom and Defense industries.

### Thousands of Customizable Products for Diverse Applications.

At Teldor, we pride ourselves on being agile. This means that we can react quickly to your changing needs. We offer fast turnaround and short delivery times, alongside advanced engineering expertise.

### No matter what your challenge is, we'll find a solution to overcome it!

Relying on our expertise in design, engineering, materials engineering and cutting-edge production technologies, we provide advanced solutions that reduce cable weight and diameter without compromising cable quality, reliability and safety.

### Benefits At A Glance:

/// Wide range of sheathing materials, armouring construction, armouring materials

/// Fully compliant with applicable standards

/// Global company, local supply - fast delivery!

/// Extensive know-how

/// Custom-made solutions

/// Engineering and consulting Services

/// Agile production capabilities

### /// Flexible

Flexibility for tight bend areas and fast deployment

### /// Signal integrity

Ensuring signal integrity and uniform impedance over long and short distance

### /// Resistant

Crush, impact, chemical, oil, fuel, mud and salt water resistant

### /// Fire Resistant

Fire resistant and flame retardant, maintaining operational integrity and safety during emergency scenarios

### /// Versatile

New cable designs for changing and varied conditions and environments

### /// Rugged

Withstands harsh and corrosive environments. Suitable for submerged and extreme temperature applications
